# TRY CYCLES

Monty lanza 3 modelos nuevos de Triciclos, dos eléctricos y uno convencional, con un nuevo diseño mucho más funcional y visual.

## CONSTRUCCIÓN

Su diseño ergonómico y de paso bajo facilita subir y bajar del triciclo. Y su cuadro plegable permite transportarlo fácilmente y aparcar en espacios reducidos.

### EJE CON DIFERENCIAL

La principal novedad en el desarrollo de los nuevos triciclos Monty es el eje con diferencial

*Eje con diferencial*

de la parte trasera, que mejora notablemente la maniobrabilidad y el control en las curvas, y reduce el radio de giro.

Además permite una frenada más efectiva y mejora la eficiencia de pedaleo.

### FRENOS HIDRÁULICOS CON BLOQUEO

Los frenos hidráulicos del modelo Rocket 24 aportan mucho más control y precisión sobre la potencia de frenada, y reducen la distancia de frenado. Ambos frenos incluyen bloqueo "modo parking".

## INTEGRACIÓN

### CONFORT O CONFORT + PACK

Los periféricos de alta gama garantizan el máximo confort; Sillín con gel (pack Confort +), tija con suspensión y manillar de doble altura con potencia regulable.

### SAFETY PACK

Incluido de serie en el modelo Rocket 24 para garantizar la máxima seguridad en la conducción; Kit de luces delantero y trasero y cubiertas antipinchazos con banda reflectante lateral.

### CAJA Y CESTA

Los nuevos triciclos Monty incluyen cestas que se han sobredimensionado para permitir el transporte de cargas más pesadas y de mayor volumen.

#### Cesta trasera

Superior: 610 x 524 mm  
Base: 520 x 455 mm  
Altura: 264 mm  
74L / 45Kg max

#### Cesta delantera

Superior: 350 x 283 mm  
Base: 310 x 190 mm  
Altura: 200 mm  
14.5L / 15Kg max

Diseño ergonómico  
plegable y de paso bajo

#### RUEDAS DE 24"

Más grandes para una mayor  
estabilidad en la marcha.

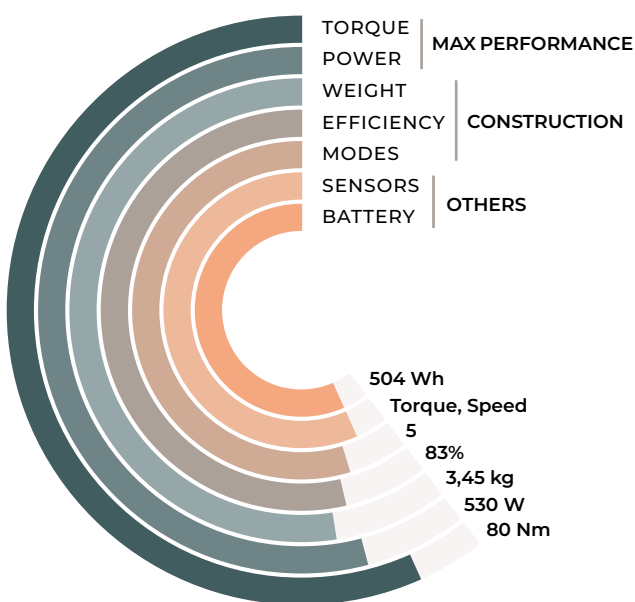

## MOTOR

La nueva gama de Triciclos eléctricos de Monty incorpora dos motorizaciones, una con motor central y otra con motor frontal.

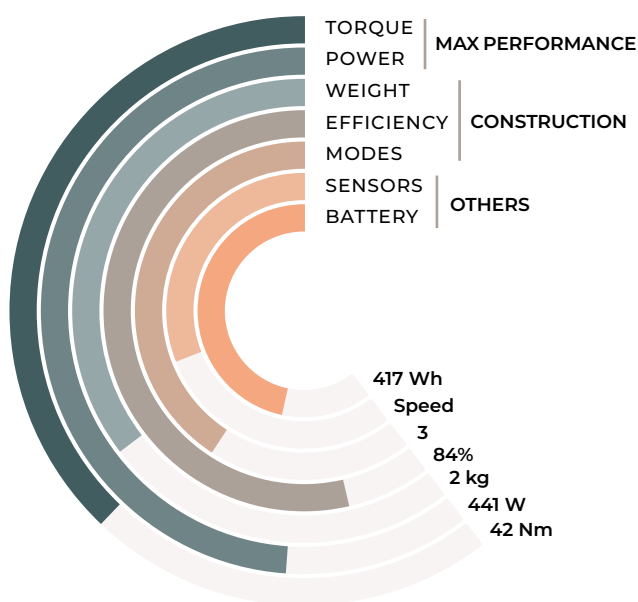

### MOTOR CENTRAL: BH DRIVE-1E 36V

El modelo Rocket 24 incorpora el motor central BH Drive-1E 36V, de triple sensor, más compacto y ligero para un alto rendimiento y máxima potencia, con una gran sensibilidad y respuesta. Tiene una eficiencia del 83% y un par máximo de 80 Nm.

### MOTOR FRONTAL

Los modelos Nuke 24 y Nuke 20 incorporan un motor frontal, de triple sensor, compacto y ligero para un alto rendimiento y alta potencia, con una gran sensibilidad y respuesta. Tiene una eficiencia del 84% y un par máximo de 42 Nm.

#### ECONOMIC HIGH PERFORMANCE

| MODE | %ASSISTANCE |
|------|-------------|
| 1    | 20 %        |
| 2    | 45 %        |
| 3    | 65 %        |
| 4    | 80 %        |
| 5    | 100 %       |

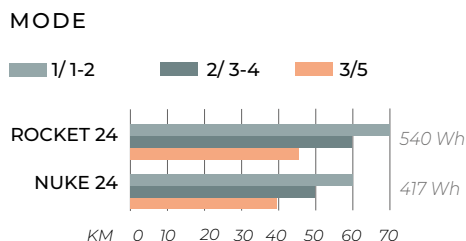

#### ECONOMIC HIGH PERFORMANCE

| MODE | %ASSISTANCE |
|------|-------------|
| 1    | 33 %        |
| 2    | 66 %        |
| 3    | 100 %       |

## BATERÍA

El puerto de carga está situado en la propia batería y permite su carga sin necesidad de extracción de la batería, o extrayendo la propia batería.

Hay 2 tipos de baterías: 540Wh para el modelo Rocket 24 y 417Wh para el modelo Nuke 24. Ofreciendo una autonomía de hasta 70km y 60km respectivamente.

Rocket 24

### DISPLAY

Situados en la zona interior del manillar para garantizar la máxima protección del mismo.

El display del modelo Rocket 24 dispone de una pantalla LCD Full Color transfectiva para garantizar la máxima visibilidad.

Y el modelo Nuke 24 dispone de un display LED.

## NEW MODEL

**PACK CONFORT+  
INCLUIDO**

Tija con suspensión, manillar de doble altura con potencia regulable y sillín gel.

**SAFETY PACK  
INCLUIDO**

Kit de luces delantero y trasero y cubiertas antipinchazo.
