Established in 1983 by BH Bikes, Monty has always preserved its essence by adapting to the times and the changes that the current world demands.

Monty has shown itself to be an innovative brand, full of new ideas, with urban mobility and people's needs always in mind.

Our electric and conventional trikes are revolutionising the way we get around in both our daily and professional lives.

MONTY
B I K E S

The new range of Monty electric trikes features two motor models, one with a MiD-motor and another with a front motor.

YOU CAN CONCENTRATE ON ENJOYING YOURSELF

The Rocket 24 model features a triple sensor BH Drive-1E 36V MiD-motor, which is more compact and lightweight to ensure high performance and maximum power, with great sensitivity and responsiveness. It has 83% efficiency and maximum torque of 80 Nm.

The Nuke 24 and Nuke 20 models feature a front motor, with 84% efficiency and maximum torque of 42 Nm.

MORE AGILE THAN EVER BEFORE

The standout new feature in the latest Monty trikes is the axle with differential in the rear section, significantly improving manoeuvrability and control on bends, and reducing the turning radius.

It also allows more effective braking and improves pedalling efficiency.

YOUR BUSINESS WITH YOU

The new Monty trikes include a front basket with a capacity of 15 kg and a rear one with 75 kg capacity. This allows them to carry heavier and bulkier loads.

STEADY ON THE MOVE

Included as standard in the Rocket 24 model to ensure maximum riding safety and stability; Front and rear light kit and anti-puncture tyres with side reflective stripe.

EVERYDAY COMFORT

Ergonomic, lowstep design makes it easy to get on and off the trike. Its folding frame makes it easy to transport and park in tight spaces.
