# CARGO TRIKES URBAN 2024

# 40 YEARS

## WHAT IS TO COME

New ways of getting around and reclaiming cities, new forms of sustainable urban mobility in every aspect.

Since the arrival of our cargo tricycles, we haven't stopped working to finally bring our latest innovations: the cargo bikes.

These new bicycle models that allow for comfortable and quick transportation of heavy loads are just the beginning of a new Monty that comes with more energy than ever before, and with the certainty that...

IT HAS NEVER BEEN SO EASY TO LEAVE THE CAR IN THE GARAGE!

# CARGO

# THE BIKE THAT ADAPTS TO YOU

## Anywhere you want, however you want

In your professional world, a cargo bike can be the answer to your needs.

Thanks to the various available solutions, you can organize your equipment and carry it wherever

you intend.

Take advantage of the versatility offered by different Monty models. Whether you need to run errands, move, take the kids to the park, or all of the above at once – a bike has infinite uses. Both in your work and in your leisure time.

**“Prepared to meet any need that may arise for you”.**

## Functionality and design for your everyday life

Thanks to the BH 1E motor and its 540Wh battery, transport and move with ease in your daily commutes.

Equipped with a rear rack ready to carry up to 70kg and 15kg in the front, they are prepared to meet any need that may arise for you.

## Customize it

Choose the model that suits you best and make it yours with various specific accessories designed for each of them.

Select from baskets, panniers, seats, platforms, bases, supports, and any accessory compatible with the MIK HD system.

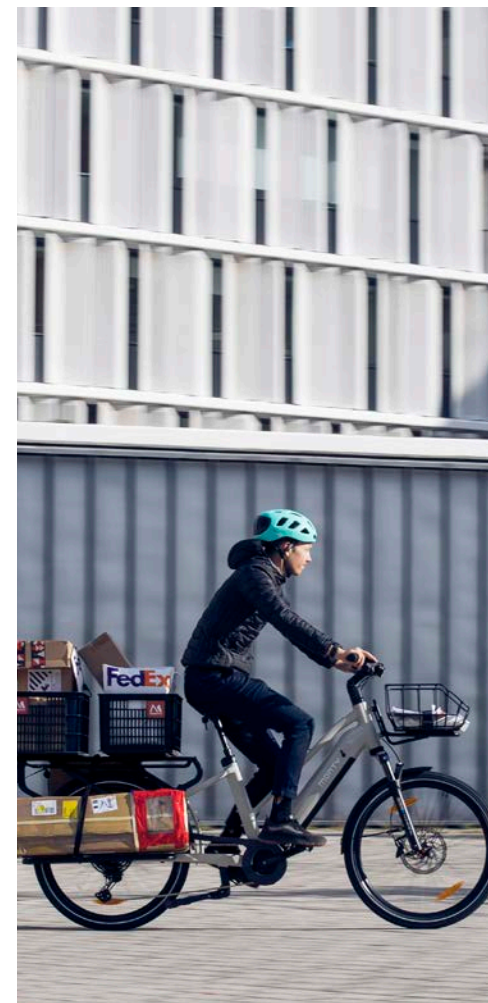

## Adaptability and safety

All models come equipped with a manual telescopic seatpost and adjustable stem to easily accommodate riders between 1.55m and 1.90m.

Built-in lock, reinforced tires with reflective band, and 2.3mm

hydraulic disc brakes ensure your safety on the move and at rest.

# MEET THE FAMILY

## V8

Unlimited possibilities, **the V8 model is the all-encompassing choice.**

26" wheels and a longtail frame allow you to take everything you set your mind to with you. Agile and adaptable, add the accessories you need to make it truly yours.

**V8** - Rigid fork, **10sp**

---

**ROVER PRO** - Suntour Fork **XCM34 Air, 11Sp**

## V6

Conventional bike geometry, **the most compact of the cargo family.**

At first glance, it looks like just another bicycle, but **it can carry up to 70 kg on its reinforced rear rack and an additional 15 kg in its handy front basket.**

**STRADA** - Rigid fork, **Alfine 11sp**

---

**ROVER** - Suntour Fork **XCM32, 11sp**

---

**ST** - V6 comes with two options for the top tube.

## V4

High load capacity and versatility with **compact dimensions.**

With it, you can navigate smoothly through heavy traffic, thanks to its **low center of gravity and small wheels** (front 24" and rear 20").

---

**ROVER** - Suntour Fork **XCM34, 11sp**

## V8

### LONG TAIL

Low-step frame with 26" wheels.

### CARGO & FAMILY

Designed for various purposes, suitable for both cargo and carrying up to two children.

## V6

### TWO FRAMES

Low step-through (ST) and high top tube frame, with 26" wheels.

### COMPACT DIMENSIONS

The size of a conventional bike but with a high load capacity.

### SUPPORT

Specially designed for cargo with its reinforced frame.

## V4

### EASY ACCESS AND MANEUVERABILITY

Compact frame with 24"-20" wheels.

### FAMILY-FRIENDLY

Can accommodate up to two children.

### VERTICAL STORAGE

Easily transport cargo on its rear or by adding a front rack.

# READY FOR EVERYTHING

## MOTOR

### CENTRAL MOTOR: BH-1E DRIVE 36V

They incorporate the BH-1E Drive 36V central motor, with triple sensors, more compact and lightweight for high performance and maximum power, providing great sensitivity and responsiveness.

It has an efficiency of 83% and a maximum torque of 80 Nm.

## BATTERY

### INTEGRATED BATTERY

The entire range is equipped with 540Wh batteries featuring the latest-generation cells, providing a range of up to 90km.

## DISPLAY

### X DISPLAY LITE

The X Display Lite is positioned in the inner area of the handlebar to ensure maximum protection.

It features a transfective color LCD screen to ensure optimal visibility.

### Rear Rack

Capacity of **70 kg**, compatible with two child seats.

### Front basket

Capacity of **15 kg**  
(Optional on some models)

381555300

## MIK FRONT RACK

A narrow rack that is very useful for transporting packages or attaching accessories compatible with the MIK system. A versatile accessory that meets the user's needs.

The MIK system allows for easy attachment of accessories.

Colour	Black
Material	Aluminium
Compatible	V4, V6 & V8 & Trikes

381555400

## UTILITY FRONT RACK

An ample rack ideal for grocery shopping, a backpack, or a box, etc. Due to its design, it can accommodate a box of up to 300 x 400 mm.

It allows for hanging larger items on the sides, making this rack a versatile accessory for multiple uses.

Colour	Black
Material	Aluminium
Compatible	V4, V6 & V8 & Trikes

381555500

## CARGO RACK

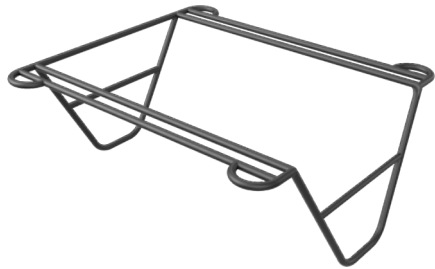

This platform features a sturdy design with a wooden base. Compatible with boxes up to 400 x 600 mm.

Perfect for transporting toolboxes or professional equipment.

Colour	Black & bamboo
Material	Aluminium & bamboo
Compatible	V6

# ACCESSORIES

381555600

## UTILITY BARS

Designed to safely carry two children.

It also works for placing a box of up to 400 x 600 mm securely.

Colour	Black
Material	Aluminium
Compatible	V4 & V8

V4 - 381555700  
V6 - 381555800  
V8 - 381555900

## BASE

This footrest base is essential for transporting children or as support for cargo. Its sturdy design can withstand weight and provides support for various loads.

Colour	Black
Material	Aluminium
Compatible	V4, V6 & V8

MIK  
CLICK

381556000

## MIK SEAT

The MIK seat is designed with a durable material similar to that of a standard saddle.

It is easily installed thanks to the MIK support.

Colour	Black
Material	Foam & wood
Compatible	V4, V6 & V8

COMING SOON

## KIDS HANDLEBAR

This handlebar can be mounted on the rack where the Utility Bars are also placed.

A fun accessory for children to enjoy their bike ride.

Colour	Black
Material	Aluminium & foam
Compatible	V6

# ACCESSORIES

V6 - 381560000  
V8 - 381556200

## WHEEL PROTECTOR

Together with the Utility Bars and the footrest base, this accessory covers the wheel for added protection during the transportation of children.

It also prevents panniers from getting caught in the wheel.

Colour	Black
Material	Aluminium & plastic
Compatible	V6 & V8

MIK

# TRIKES

## CONSTRUCTION

Its ergonomic and low-step design makes it easy to get on and off the tricycle. The foldable frame allows for easy transportation and parking in tight spaces.

### DIFFERENTIAL AXLE

The key innovation in the development of the new Monty tricycles is the rear axle with a differential, significantly enhancing maneuverability and control in curves while reducing the turning radius.

It also enables more effective braking and improves pedaling efficiency.

### HYDRAULIC BRAKES WITH LOCK

The hydraulic brakes on the Rocket 24 model provide much more control and precision over braking power, reducing stopping distances.

Both brakes include a “parking mode” lock feature.

#### Front basket

Superior: 350 x 283 mm

Base: 310 x 190 mm

Height: 200 mm

14.5L / 15Kg max

#### Rear basket

Superior: 610 x 524 mm

Base: 520 x 455 mm

Height: 264 mm

74L / 45Kg max

Ergonomic,  
Foldable,  
and Low-  
Step Design

#### 24" Wheels

Larger wheels for increased stability during rides.

## ■ INTEGRATION

### CONFORT OR CONFORT + PACK

High-end peripherals ensure maximum comfort; Gel saddle, suspension seat post (Comfort+ package), and adjustable dual-height handlebar stem.

### SAFETY PACK

Included as standard in the Rocket 24 model to ensure maximum safety during rides; Front and rear light kit, and puncture-resistant tires with reflective side strip.

### REAR CARGO

Monty tricycles come with baskets or cargo platforms to allow the transportation of heavier and larger loads.

## ■ MOTOR

The new range of Monty electric tricycles incorporates two motorizations, one with a central motor and another with a front motor.

### CENTRAL MOTOR: BH-1E DRIVE 36V

The Rocket 24 model features the BH-1E Drive 36V central motor, equipped with triple sensors, more compact and lightweight for high performance and maximum power. It provides excellent sensitivity and responsiveness, with an efficiency of 83% and a maximum torque of 80 Nm.

### FRONT MOTOR

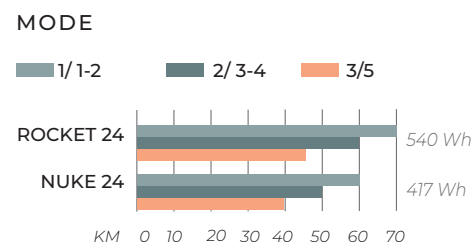

The Nuke 24 model incorporates a new front motor, equipped with triple sensors, compact and lightweight for high performance and power, with excellent sensitivity and responsiveness. It boasts an efficiency of 84% and a maximum torque of 42 Nm.

## ■ BATTERY

The charging port is located on the battery itself, allowing for charging without the need to remove the battery or by extracting the battery.

There are two types of batteries: 540Wh for the Rocket 24 model and 417Wh for the Nuke 24 model. They offer a range of up to 70km and 60km, respectively.

### DISPLAY

Located on the inner part of the handlebar to ensure maximum protection.

The Rocket 24 model's display features a transfective color LCD screen for optimal visibility.

The Nuke 24 model is equipped with an LED screen.

Rocket 24

## ALL-TERRAIN

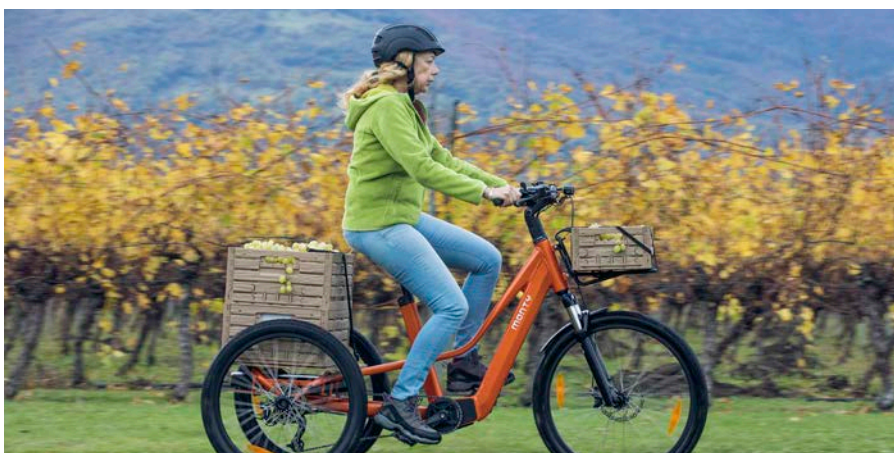

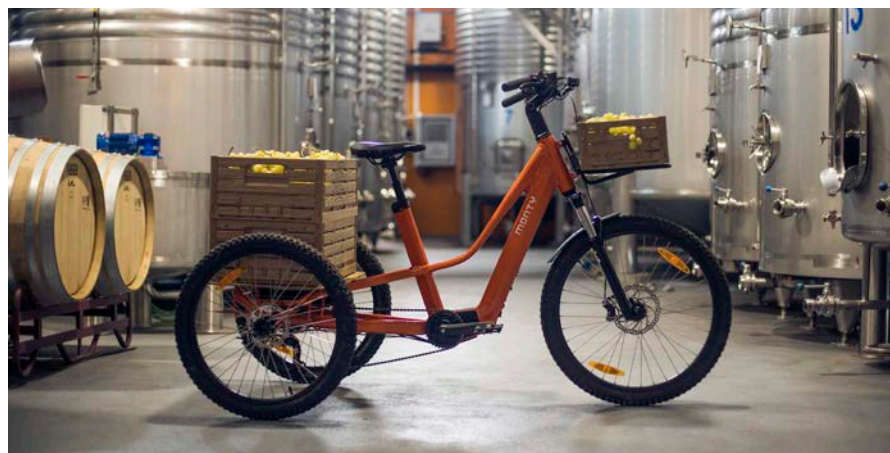

Oversized single-piece frame with hydroformed tubing.

Equipped with a 31.8mm stem and handlebar, and reinforced double-wall rims with a width of 25mm.

## ADDITIONAL SAFETY

Its dual Tektro Auriga+ rear brake ensures a much safer and reliable braking experience, even when carrying a load.

Equipped with a 32mm suspension fork with 100mm travel for a more comfortable ride.

## DON'T STOP

With its BH-1E central motor and a 720Wh battery with the latest generation cells, you set the limits.

And if that's not enough for you, it has enough space to install a second battery, increasing its capacity to 1440Wh.
